

AMBI COOL

BUBBLE INSULATION

WAVELINE INDUSTRIES has promoters with four decades of experience in plastic industry. Our Group comprises of leading professionals and state of the art technology which help us manufacture and deliver top quality products to our esteemed clients. We are in the business to innovate and delight our customers. We are determined to deliver excellence in every single product that we bring to the market. We are one of the leading manufacturers in the country offering 7-layer Air Bubble Packaging and Double Bubble Reflective Thermal Insulation solutions. With a strong infrastructure of 20,000 sq.ft. manufacturing facility, in-house fabrication capabilities and stable base of factory workers, we are able to offer quality consistent products. Our manufacturing facility is as clean as a chef's kitchen to ensure highest quality and dust free production of your packaging material.

We at WAVELINE manufacture AMBICOOL air bubble insulation using the latest technology, made to order for virtually any industry. We are one of the largest manufacturers in India to produce double bubble insulation sheet with state of the art extrusion lamination technology. We manufacture insulation sheets of varying thickness, ranging from 4MM to 20MM. While conventional insulations absorb the thermal radiations, AMBICOOL bubble insulation reflects the thermal radiations and insulates the heat, thus keep the ambient temperature in check. AMBICOOL bubble insulation is light weight and long lasting as compared to the conventional thermal insulations. AMBICOOL bubble insulation is easy to install and non-hazardous.

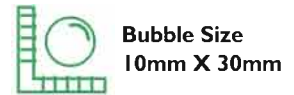

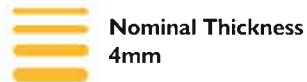

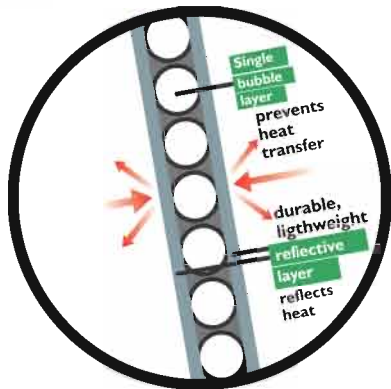

Our Esteemed Clients

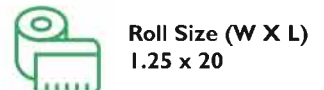

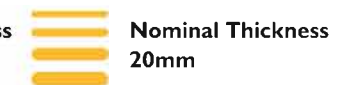

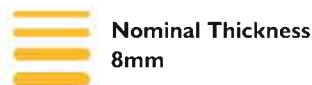

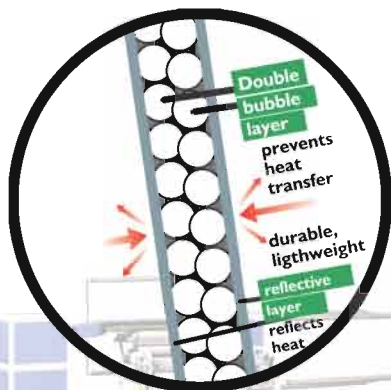

Escape the Heat With
AMBICOOL Insulation

OUR PRODUCT RANGE

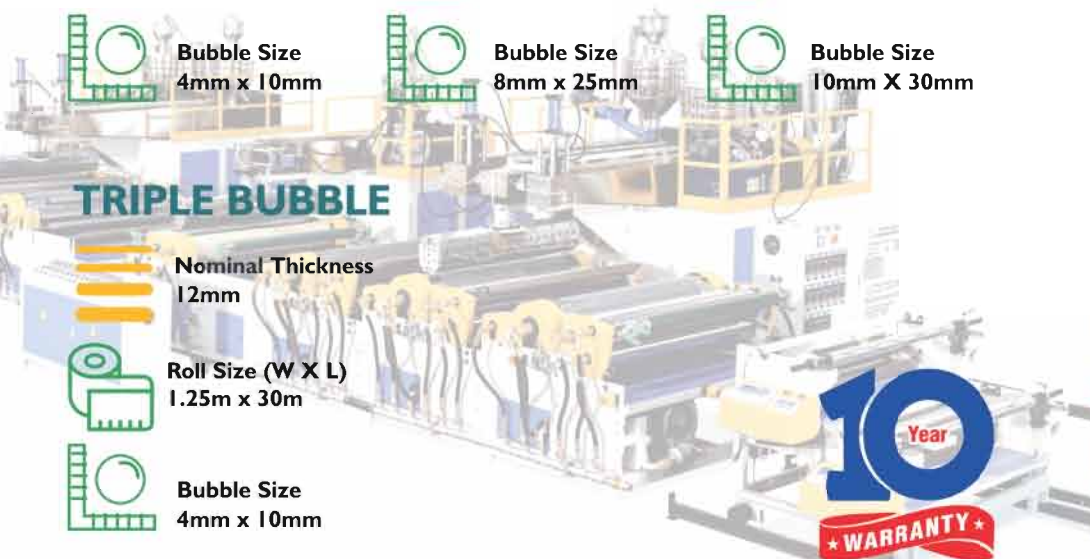

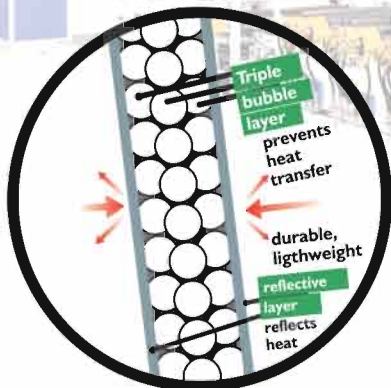

SINGLE BUBBLE

DOUBLE BUBBLE

TRIPLE BUBBLE

AMBICOOL FLBI sheets by WAVELINE are reflective thermal insulation sheets that offer superior heat barrier properties. Our insulation sheets are made from high grade Polyethylene Air Bubble pockets covered and laminated with Pure Aluminium Foil on single side or both side (as per requirement). The reflective aluminium foil reflects 97% of outside heat and the trapped air between two aluminium sheets act as a perfect insulator of heat, thereby significantly reducing ambient temperatures.

Benefits over conventional insulation methods: Escape the Heat with AMBICOOL Insulation

10-Year Warranty AMBICOOL sheets are made from homogenous material which makes it non-hazardous, extremely durable, and free from any microbial growth throughout its life cycle. Since these insulation sheets are light weight and easy to handle, they are used for a wide range of applications. Starting from secure transportation of heat sensitive products such as dairy products, chocolates, perishable food products, medicines, cosmetics etc. to insulating large establishments like Commercial and Industrial PEB structures, residential buildings, poultry farms, livestock buildings, pole barns and many more.

APPLICATIONS

UNDER DECK INSULATION

METAL BUILDING INSULATION

INSULATED PALLET COVERS

INSULATED CARTON LINER

HVAC DUCT INSULATION

INSULATED BUBBLE POUCHES
